What are Mutual Benefits?

British Friendly is a mutual Society which means we are owned by our members and have no shareholders to pay. This means our number one priority is serving members through paying claims and adding more valuable benefits to our members' policies.

Mutual Benefits is one of the ways we are returning value back to our members, bringing membership to life whether a member claims or not.

Most insurance policies only come to life when something bad happens - with Income Protection this means when you are sick or injured and cannot work. But with Mutual Benefits, our members receive a range of additional discretionary benefits that can be used anytime.

Mutual Rewards

Helping members save money on day to day spending and rewarding them for the time they've been a member.

- High street discounts
